About Altivon Global

AltivonGlobal connects international buyers with Indian-origin botanical and agricultural products. We focus on clear communication, buyer-specific sourcing, practical packaging options and export coordination tailored to destination requirements.

Our export approach

• **Buyer-focused sourcing:** Product and packaging discussions based on the buyer's intended application and market.

• **Quality documentation:** Product-specific Certificate of Analysis (COA) and supporting documents, subject to availability and the shipment batch.

• **Flexible packaging:** Standard bulk packs and customised packaging options.

• **Export coordination:** Commercial terms and delivery planning aligned with the destination country and agreed order requirements.

Our commitment: responsive communication, transparent commercial discussions and documentation aligned with the confirmed product and destination requirements.

Beetroot Powder

Product overview

Beetroot powder is made from beetroot that is cleaned and processed into a dried powder. Colour, flavour, solubility and other characteristics vary with the raw material and processing method.

Potential applications

Potential applications include foodmixes, beverage blends, bakery and culinary formulations, subject to buyer specifications and applicable regulations.

Product details

Form	Powder
Colour / aroma / taste	To be confirmed against the actual production batch and approved specification.
Mesh size	Available grade to be confirmed with supplier/buyer.
Moisture, ash, nutrition	Values to be stated from current product specification and/or laboratory report.
Microbiology, heavy metals, pesticides	Batch-specific test results / COA to be shared where available and agreed.
Shelf life and storage	Confirm from validated product specification. Store sealed in a cool, dry place away from direct sunlight and moisture.

Quality, Documentation & Export

Quality assurance

Product quality parameters should be agreed before order confirmation and verified using the applicable product specification and current test documentation. Where required and available, the buyer may request a batch-specific COA and supporting laboratory reports.
